PRÆFATIO.

NEMO est qui nescit Geographiam tanquam Oculum esse Historiæ, neq; Classicos Scriptores, vel Græcos, vel Romanos, veteris Literaturæ monumenta, nisi Tabularum Geographicarum ope, posse cum fructu legi. Atque hinc quidem factum est, quod plerisq; veterum scriptorum mellioris notæ Editionibus, ejusmodi Tabulæ semper ferè affigantur, etsi rudiores ea sint, & minùs correctæ, gravioris tamen pretii quàm ut à pueris possint comparari. Verùm quo aliquid fieret quod tam communioris esset usus, quàm vilioris pretii, in usum præcipuè Juventutis, visum est numero cuidam doctorum virorum, in quibus Episcopus erat eruditissimus, opus hoc sermone Gallico aggredi, cumq; implèssent ejus numeros, in quantum modulus operis pateretur, communicatum est clarissimo Domino *Du Val*, qui illo tempore Geographus fuerat Ludovico XIV. Gallorum Regi, qui quondam Amanuensis fuerat prædicto Episcopo; atq; ille in Lucem edidit XXVIII Tabulis, in quibus Veteris Orbis describebantur Imperia, Regna, Provinciæ, Urbes præcipuæ, Oppida, Fluvii, Montesque, &c. Cum verò plurimis Locorum veterum nominibus Gallicas ille fecerit Terminationes, quod Herculè non est illi proprium, cum & alii plurimi ante illum idem fecerint, quo placerent suis, nos instituti nostri duximus diversâ niti ratione, nam secuti sumus *Eachardum* nostrum, *Cellarium*, atq; alios quorum ope in hoc opusculo uti sumus.

PREFACE

IT'S no new Observation that Geography is as it were the Right Hand of History; and that the Classics, whether Greek or Latin, those excellent Monuments of Ancient Learning, cannot rightly be understood without the help of Maps of those Countries they treat of; hence it is that in all the valuable Editions of the Classics, Maps have been fitted for them, tho' not so correct as could be wish'd, and yet commonly so dear as not to be purchas'd by the generality of School-Boys.

But that something might be done of more universal Use as well as Cheapness to Scholars, a set of Curious Gentlemen in France, among whom there was a learned Prelate, undertook this Work in good earnest, and having brought it to as great a Perfection as the bigness of the Design would bear, the Compositions were put into the Hands of Monsi. *Du Val*, Geographer to the French King, *Lewis XIV.* who was for some time *Amanuensis* to the said Bishop, and publish'd it in 28 Maps of the old World and its several Empires, Kingdoms and Provinces, Chief Cities, Towns, Rivers, Mountains, &c. but as he has given French Terminations to most of the Ancient Places, which is a thing not singular to him with respect to his Countrymen, who have done the like upon other occasions, 'tis what we thought absolutely necessary to see rectify'd, and have therefore done it according to Mr. *Eachard's* Classical Geographical Dictionary, *Cellarius*, and the Corrections of other learned Gentlemen now living, who assisted in this Work.

P R A E F A T I O.

Nemo est qui non videbit protinùs Tabellas istas Geographicas adornatas fuisse in usum Scholasticae Juventutis. Omnes Novae sunt, confectaeq; juxta nuperrimas, & accuratissimas Observationes: harum singulae scalam habent Milliarium Britannicorum, quibus singulis sexaginta sunt Gradus. Ubi vero Gradus minutiores sunt quam ut responderent uni Scalae, usi sumus Mercatoris Projectione, eique accommodavimus scalam, de qua videsis Orbis Tabulam N. 1. &c. Hæc poterunt Discientes facillimè Intervalla metiri, usumq; percipere tam Antiquarum, quam Recentiorum Tabularum. Neq; hoc loco prætereundum duco quàm proficuum hoc opusculum futurum sit etiam provectioris ætatis hominibus in Classicorum Lectione.

Huic etiam Compendio Quatuor novas subjecimus Tabulas: Unam, Civilium Bellorum Julii Cæsaris, & Pompeii Magni, N. 27. Alteram Itinerum Israëlitarum in Arabiae Deserto, una cum Descriptione Sanctæ Terræ, sive Canaan, N. 31. Tertiam, Itinerarii Divi Pauli, aliorumq; Locorum, quorum sit mentio in Testamento Novo, Vide N. 32. Quartam, Tabulam Asiæ Antiquæ, primorumq; post Diluvium Populorum, N. 30. Hæc confecta est à Clarissimo W. Stukeley, M. D. Regiæ Societatis Socio, quam ille nobis benignissimè impertivit, cui unà cum aliis viris doctis opem nobis ferentibus grates agimus meritissimas. In Ordinandis autem istis Tabulis nullam rationem positionis habendam existimavimus, cum hoc nullo modo necessarium fuerit nostro Instituto, vel operis Legi. Tu verò, mi Lector, benè Consule, &c. vale.

It's obvious that this Collection of New Maps is principally design'd for the Service of the Schools; they are all of them New, and laid down according to the latest and most exact Observations that have been made; each Map having a Scale of *British* Miles, 60 to One Degree; and where the Number of Degrees are too many to answer to one Scale, we have made use of *Mercator's* Projection, and fitted a Scale accordingly, for which see *Orbis Tabula*, N. 1. &c. Here the Scholar may measure Distances with Pleasure, and naturally be led to understand the Use of ancient and modern Maps; neither must we omit the Improvement this Collection may likewise yield to those of riper Years, who take Delight to read the Classics.

We have added Four New Maps to this Collection, viz. a Map of the Civil War between *Cæsar* and *Pompey*, N. 27. The Journeying of the Children of *Israel* in the Wilderness, together with the Land of *Canaan*, &c. N. 31. The Travels and Voyages of *St. Paul*, and of the other Places mentioned in the Books of the New Testament, &c. N. 32. Another is the Scriptural Map of the Ancient *Asia*, as Peopled after the universal Deluge, N. 30. which was much wanted, it is the Composition of the Learned Dr. *Stukeley*, Fellow of the Royal Society, who most generously presented us with it, for the Incouragement of this Design, to whom we return our hearty Thanks, as we do also to the other Gentlemen, who gave us their Assistance in this Work.

As to the placing of the Maps, more regard has been had to the Connection and Relation they have to one another, in respect to Empires, Conquests, Situation of Countries, &c. and to Time, than to the Antiquity of the Authors, from whose Works they have been extracted; and forasmuch as some of them differ from the rest in Size, it could not possibly be avoided without cramping the Design.
